

FIXING KIT INSTRUCTIONS

Each cabinet has to be fixed to the ground using the provided fixing kit and following the below instructions.

BACK FIXING

Each cabinets has to be fixed with two back fixing brackets (A). First fix two screws on the ground. Screws must be place considering distances W2 (60mm) and D3 (30mm).

Fix the two brackets to the cabinet, between the cabinet and the two back feet. After place carefully the cabinet into place; make sure that the screws fit in the bracket hole.

FRONT FIXING

Each cabinet has to be fixed in the front in order to prevent it from tipping forward. Use a screw to fix it to the ground.
