Part number and serial number

Electronic board is just under the capacitor pack.
Important: Vega MK2 panel must have the software release 5.6 or higher.

Fan speed
Capacitors pack

Opening the box, there is the capacitor pack. The capacitor pack is designed for a specific model of fan coil. The capacitor pack is the only difference between control boxes of different fancoils' model. The box and the electronic board are the same. The fan coil must be connected to its compatible control box.

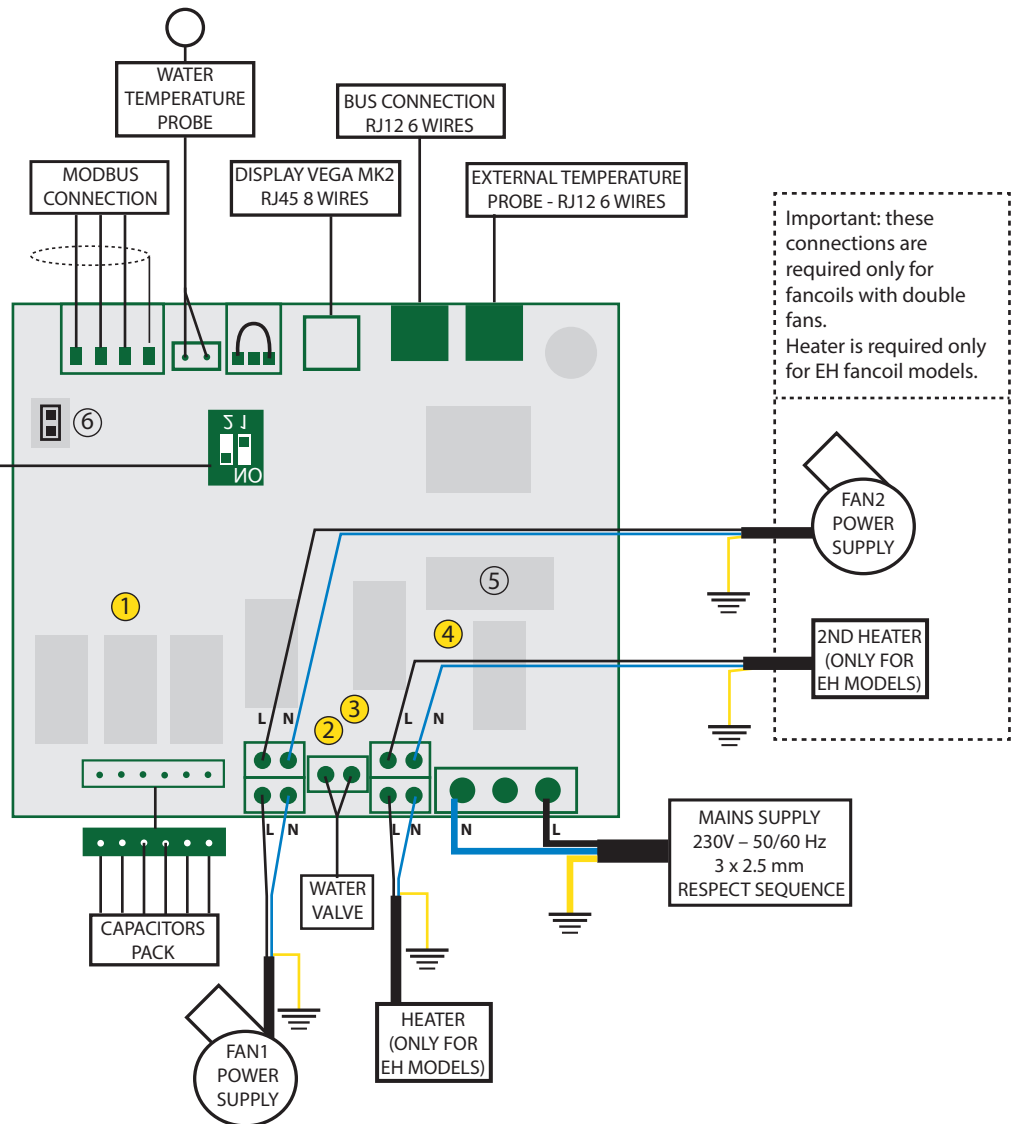

ELECTRONIC BOARD SETTINGS AND CONNECTIONS

IMPORTANT
the MV8 control box is delivered without MODE setting (Npr) and must be set to the actual fan coil configuration
