Freezer volume	3.6 litres

LIST PRICE £664.45 EX VAT

Popular fridge for VW T4, VW T5, VW T6, Mercedes Vito and Ford Transit conversions. Low height with same dimensions as the Waeco / Dometic CR50. Easily installed with the compressor mounted behind the ice box at the top of the cabinet. An ideal fridge for small campervan conversions, fitting below a Smev or Can sink and hob with room for a cutlery drawer above.

Chromelock: the smart locking system

The Chromelock system allows secure locking of the door even during intensive and extreme use of the vehicle.

INTEGRATED VENT POSITION

Incorporated into the **CHROMELOCK** handle is the "vent position" function, allowing the door to be held ajar, thus avoiding the formation of mould and odours during periods of non-use.

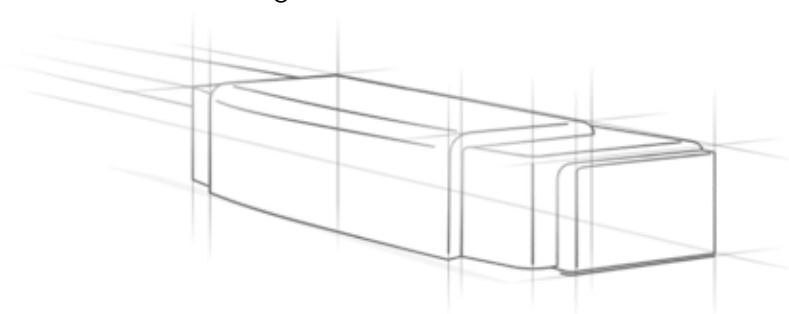

THE NEW DOOR

- Lighter with the same overall dimensions and totally built-in, with a smooth and elegant side frame, 42 mm thick.
- Reversible and available in two colour variants: grey (Light) and black (Dark). The Light version has an elegant glossy grey laminated panel with a pearly effect, while in the Dark version the panel is matt black with anti-fingerprint and scratch resistant finish with soft touch effect.

- Possibility to use finishing panels from 0.8 to 3.0 mm thick, guaranteeing simple and ultra-fast installation
- Removable seal for replacement or cleaning

THE NEW CHROMELOCK HANDLE

- Elegant satin finish tested for over 150,000 opening and closing cycles
- Positive and safe door closing
- Integrated "vent position"

CHROMELOCK is the **NEW** series of refrigerators and freezers. The door has been redesigned, both from an aesthetic and a functional point of view. With the same dimensions as the previous "Airlock" version, the new door is lighter, sturdier and it can be customized quickly and easily using finishing panels with a thickness from 0.8 to 3.0 mm. Available in anti-fingerprint and

anti-scratch matt black finish with soft touch effect, or in glossy grey laminate with pearl effect. The new **CHROMELOCK** handle, tested for over 150,000 opening and closing cycles, incorporates the "vent position" system for keeping it in a slightly open position when not in use. The series is dedicated to any need and to any type of vehicle: fridge-freezer, fridge only, with

door or drawer opening, also with the option of integral or remote refrigeration unit which can be installed up to 1.5m away. **CHROMELOCK** version also includes two **NEW** SLIM models, designed specifically for the RV sector and equipped with a digital thermostat, with advanced functions for managing temperature, energy saving and noise reduction during the night.
